SKILLS

- Java
- JavaScript
- Python
- PHP
- Postman

- Python
- C
- Docker, Linux
- Python

EDUCATION

- JSPM BSIOTR Pune | IT   *(2026)*
- SNJB Polytechnic Chandwad | Computer Technology   87.41% | *(2023)*
- XII (CBSE) | School   *79.2%| 2020*

ACADEMIC PROJECTS

- **Campus Surveillance using OpenCV in Python (Machine Learning)**
  - Engineered an innovative campus surveillance solution leveraging OpenCV and Python, seamlessly integrating face detection, recognition, and advanced movement tracking for enhanced security.
  - Pioneered real-time monitoring, harnessing the power of OpenCV for cutting-edge image processing, and optimizing data storage with a robust SQL backend.
  - Spearheaded improvements in campus efficiency by implementing seamless attendance tracking and insightful analysis of teacher activities.
  - Collaborated within a dynamic team to successfully deploy and validate the system, earning commendation for its transformative impact on security and operational efficiency.
  - Established a real-time monitoring system to track student attendance and analyze teacher activities.
- **IRCTC Booking System (JAVA)**
  - Developed a web-based train ticket booking application using Java and Spring Boot.
  - Implemented Spring MVC for efficient request handling and Thymeleaf for dynamic web pages.
  - Designed and managed relational database with MySQL for efficient data storage and retrieval.
  - Ensured seamless user experience with front-end technologies like HTML, CSS, and JavaScript.
- **Library Management System (Java)**

ACHIEVEMENTS / HOBBIES

- Contributed to Ideation Challenge with Navayuvak Entrepreneurs, fostering collaborative innovation and creative problem-solving for entrepreneurial ventures.

- Participated in C-Fighter Coding Competition
